

Valentín Lunaklick *Fullstack developer*

📌 Web in vlunaklick 🔄 vlunaklick

Profile

I am Valentín, a Fullstack developer from Buenos Aires. I am working at CryptoMate and studying the "Bachelor in Information Systems".

My favorite technological stack is formed by JavaScript, React and Next, Express, Prisma and PostgreSQL.

Experience

2022 – Current

JR. Fullstack Developer, *Cryptomate*

I joined the team as a backend developer where I helped with the implementation of small features in APIs in Node.js and Golang. As time went on, I was assigned to develop APIs and services on my own in Java with Spring Boot. After a while, I got promoted to a Fullstack charge.

Education

2021 – Current

Bachelor in Information Systems, *Universidad del Salvador*

Currently, I am taking part of subjects like "Data structure and Algorithms", "Programming II", "Information systems" and I have programmed in languages such as Python, C and Golang.

Skills

Javascript

As my main web language.

Next.js

As React's framework.

Express

As Node.js' framework.

Prisma

As an ORM to interact with the database.

MongoDB

As a non relational database.

React

As JavaScript's framework.

Node.js

To use JavaScript on the server's side.

PostgreSQL

As a relational database.

Golang

To make APIs and services.

Java

For the development of APIs and services.

Certificates

JavaScript Algorithms and Data Structures [🔗](#) | Responsive Web Design [🔗](#)
