PROFESSIONAL EXPERIENCE

CryptoMate   Apr 2022 – Present
Full Stack Developer
- Enhanced website performance, resulting in increased user satisfaction, by incorporating frontend development skills using tools like React and Next.js.
- Efficiently managed and retrieved data by designing, developing, and maintaining several APIs using Node.js and PostgreSQL, resulting in effective data management.
- Improved data management by developing databases, resulting in more efficient and effective data retrieval.
- Expanded skill set by taking on a Full Stack role, including frontend development, resulting in an increase in capabilities and contributions to the company.

EDUCATION

Universidad del Salvador   Mar 2021 – Dec 2024
Bachelor's in Information Systems
- Relevant Courseworks: Data Structures and Algorithms, Information Systems, Programming II, Database Systems, Advanced Programming.

PROJECTS

Live in Chat
- Created a real-time chat application using Next.js and Express in the frontend and backend, respectively.
- Set up a separate server to host the socket.io server, enabling real-time communication between the client and server.
- Developed a seamless and interactive communication experience for users by allowing them to send and receive messages in real-time.

Littera
- Developed a social media platform using a modern web development stack that includes Next.js, TailwindCSS, and Firebase.
- Built a variety of features that enable users to create and share content, follow other users, and view profiles.
